BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

- BLACK BORDERS**
- IMAGE CUT OFF AT TOP, BOTTOM OR SIDES**
- FADED TEXT OR DRAWING**
- BLURRED OR ILLEGIBLE TEXT OR DRAWING**
- SKEWED/SLANTED IMAGES**
- COLOR OR BLACK AND WHITE PHOTOGRAPHS**
- GRAY SCALE DOCUMENTS**
- LINES OR MARKS ON ORIGINAL DOCUMENT**
- REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY**
- OTHER: _____**

IMAGES ARE BEST AVAILABLE COPY.

As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.

NPL Services for Examiners

Serial Renewal Review for 2005

Xreferplus

—Multidisciplinary reference works including encyclopedias, dictionaries, thesauri and books of quotations.

Monday, October 11, 2004

STIC's mission is to connect examiners to critical prior art by providing information services and access to NPL electronic resources and print collections. A STIC facility is located in each Technology Center.

Most of the electronic resources listed on this site are accessed via the Internet. Please obey USPTO "Rules of the Road ([PDF Text](#))" when using Internet resources.

IEEE TO INTRODUCE NEW BROWSER REQUIREMENTS IN 2005 ... [More](#)

IEEE Xplore provides full-text access to IEEE transactions, journals, magazines and conference proceedings published since 1988 plus select content back to 1950, and all current IEEE Standards.

FREE TO ALL: Browse tables of contents and access Abstract records of IEEE transactions, journals, magazines, conference proceedings and standards.

IEEE MEMBERS: Browse or search to access any complete Abstract record as well as articles from IEEE Spectrum Magazine. Access your personal online subscriptions using your active IEEE Web Account. If you do not have one, go to "Establish IEEE Web Account" to set up an account.

CORPORATE, GOVERNMENT AND UNIVERSITY

SUBSCRIBERS: Search and access complete Abstract records and full-text documents of the IEEE online publications to which your institution subscribes.

Results Key:

JNL = Journal or Magazine **CNF** = Conference **STD** = Standard

1 Robust two-stage approach for image motion estimation

Cheng-Yuan Tang; Yi-Ping Hung; Zen Chen;
Electronics Letters , Volume: 34 , Issue: 11 , 28 May 1998
Pages:1091 - 1093

[Abstract] [PDF Full-Text (544 KB)] **IEE JNL**

2 The recognition of human movement using temporal templates

Bobick, A.F.; Davis, J.W.;
Pattern Analysis and Machine Intelligence, IEEE Transactions on , Volume: 23 , Issue: 3 , March 2001
Pages:257 - 267

[Abstract] [PDF Full-Text (872 KB)] **IEEE JNL**

3 The influence of the boundary conditions on the robustness of a CNI

Mirzai, B.; Moschytz, G.S.;
Circuits and Systems I: Fundamental Theory and Applications, IEEE Transactions on [see also Circuits and Systems I: Regular Papers, IEEE Transactions on] , Volume: 45 , Issue: 4 , April 1998
Pages:511 - 515

[Abstract] [PDF Full-Text (248 KB)] **IEEE JNL**

4 Using hidden Markov model for information extraction based on multiple templates

Yunzhong Liu; Yaping Lin; Zhiping Chen;
Natural Language Processing and Knowledge Engineering, 2003. Proceedings. International Conference on , 26-29 Oct. 2003
Pages:394 - 399

[\[Abstract\]](#) [\[PDF Full-Text \(399 KB\)\]](#) [IEEE CNF](#)

5 A hierarchical statistical modeling approach for the unsupervised 3D reconstruction of the sciotic spine

Benameur, S.; Mignotte, M.; Parent, S.; Labelle, H.; Skalli, W.; De Guise, J.A.
Image Processing, 2003. Proceedings. 2003 International Conference on , Volume: 1 , 14-17 Sept. 2003

Pages:I - 561-4 vol.1

[\[Abstract\]](#) [\[PDF Full-Text \(383 KB\)\]](#) [IEEE CNF](#)

6 The representation and recognition of human movement using temporal templates

Davis, J.W.; Bobick, A.F.;
Computer Vision and Pattern Recognition, 1997. Proceedings., 1997 IEEE Computer Society Conference on , 17-19 June 1997
Pages:928 - 934

[\[Abstract\]](#) [\[PDF Full-Text \(692 KB\)\]](#) [IEEE CNF](#)

7 Human face image coding using deformable templates, wavelet decomposition and VQ

Sakalli, M.; Hong Yan;
TENCON '97. IEEE Region 10 Annual Conference. Speech and Image Technologies for Computing and Telecommunications', Proceedings of IEEE , Volume: 2 , 2 Dec. 1997
Pages:569 - 572 vol.2

[\[Abstract\]](#) [\[PDF Full-Text \(552 KB\)\]](#) [IEEE CNF](#)

8 Template-based image retrieval

Bo Tao; Dickinson, B.;
Image Processing, 1996. Proceedings., International Conference on , Volume: 3 , 16-19 Sept. 1996
Pages:871 - 874 vol.3

[\[Abstract\]](#) [\[PDF Full-Text \(568 KB\)\]](#) [IEEE CNF](#)

9 Unsupervised speaker adaptation methods for vowel templates

Sugiyama, M.;
Acoustics, Speech, and Signal Processing, IEEE International Conference on ICASSP '86. , Volume: 11 , Apr 1986
Pages:2639 - 2642

[\[Abstract\]](#) [\[PDF Full-Text \(136 KB\)\]](#) [IEEE CNF](#)

10 A new structure of large-neighborhood cellular nonlinear network (CNN)

*Chiu-Hung Cheng; Sheng-Hao Chen; Li-Ju Lin; Kuan-Hsun Huang; Chung-Yu Neural Networks, 2003. Proceedings of the International Joint Conference on , Volume: 2 , 20-24 July 2003
Pages:1497 - 1501 vol.2*

[Abstract] [PDF Full-Text (319 KB)] IEEE CNF

11 Image search using deformable contours

Tipwai, P.; Madarasmi, S.;

Image Processing. 2002. Proceedings. 2002 International Conference on , Vol 1 , 22-25 Sept. 2002

Pages:I-437 - I-440 vol.1

[Abstract] [PDF Full-Text (358 KB)] IEEE CNF

12 Variable neighborhood search for geometrically deformable template

Lalonde, M.; Gagnon, L.;

Pattern Recognition, 2002. Proceedings. 16th International Conference on , Volume: 2 , 11-15 Aug. 2002

Pages:689 - 692 vol.2

[Abstract] [PDF Full-Text (386 KB)] IEEE CNF

13 On-line pen input signature verifier PPI (pen-position/pen-pressure/pen-inclination)

Komiya, Y.; Matsumoto, T.;

Neural Information Processing, 1999. Proceedings. ICONIP '99. 6th International Conference on , Volume: 3 , 16-20 Nov. 1999

Pages:1236 - 1240 vol.3

[Abstract] [PDF Full-Text (284 KB)] IEEE CNF

14 Toward a universal mapping algorithm for accessing trees in parallel memory systems

Auletta, V.; Das, S.K.; De Vivo, A.; Pinotti, M.C.; Scarano, V.;

Parallel Processing Symposium, 1998. 1998 IPPS/SPDP. Proceedings of the First Merged International...and Symposium on Parallel and Distributed Processing 1998 , 30 March-3 April 1998

Pages:447 - 454

[Abstract] [PDF Full-Text (760 KB)] IEEE CNF

15 Interactive acquisition of thematic information of Chinese verbs for judicial verdict document understanding using templates, syntactic classification and heuristics

Lin, K.H.C.; Rey-Long Liu; Von-Wun Soo;

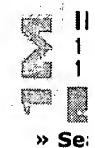

Document Analysis and Recognition, 1995., Proceedings of the Third International Conference on , Volume: 1 , 14-16 Aug. 1995

Pages:297 - 300 vol.1

Relevance scale **1** Mapping GUIs to auditory interfaces

Elizabeth D. Mynatt, W. Keith Edwards

December 1992 **Proceedings of the 5th annual ACM symposium on User interface software and technology**Full text available:  pdf(1.25 MB)Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper describes work to provide mappings between X-based graphical interfaces and auditory interfaces. In our system, dubbed Mercator, this mapping is transparent to applications. The primary motivation for this work is to provide accessibility to graphical applications for users who are blind or visually impaired. We describe the design of an auditory interface which simulates many of the features of graphical interfaces. We then describe the architecture we have built to model and tr ...

2 System papers: advanced interaction tools: First prototype of conversational H.C. Andersen

Niels Ole Bernsen, Marcela Charfuelà, Andrea Corradini, Laila Dybkjær, Thomas Hansen, Svend Kjær, Mykola Kolodnytsky, Dmytro Kupkin, Manish Mehta

May 2004 **Proceedings of the working conference on Advanced visual interfaces**Full text available:  pdf(213.00 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

This paper describes the implemented first prototype of a domain-oriented, conversational edutainment system which allows users to interact via speech and 2D gesture input with life-like animated fairy-tale author Hans Christian Andersen.

Keywords: domain-oriented spoken conversation, life-like animated agents

3 Access control with IBM Tivoli access manager

Günter Karjoth

May 2003 **ACM Transactions on Information and System Security (TISSEC)**, Volume 6 Issue 2Full text available:  pdf(367.07 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Web presence has become a key consideration for the majority of companies and other organizations. Besides being an essential information delivery tool, the Web is increasingly being regarded as an extension of the organization itself, directly integrated with its operating processes. As this transformation takes place, security grows in importance. IBM Tivoli Access Manager offers a shared infrastructure for authentication and access

management, technologies that have begun to emerge in the com ...

Keywords: Access control, WWW security, Web servers, authorization management

4 Active rules for XML: A new paradigm for E-services

Angela Bonifati, Stefano Ceri, Stefano Paraboschi

August 2001 **The VLDB Journal — The International Journal on Very Large Data Bases**,

Volume 10 Issue 1

Full text available:  pdf(81.58 KB) Additional Information: [full citation](#), [abstract](#), [index terms](#)

XML is rapidly becoming one of the most widely adopted technologies for information exchange and representation. As the use of XML becomes more widespread, we foresee the development of active XML rules, i.e., rules explicitly designed for the management of XML information. In particular, we argue that active rules for XML offer a natural paradigm for the rapid development of innovative e-services. In the paper, we show how active rules can be specified in the context of XSLT, a pattern-based la ...

Keywords: Active databases, Document management, Query languages for XML, XML, XSLT

5 The Java syntactic extender (JSE)

Jonthan Bachrach, Keith Playford

October 2001 **ACM SIGPLAN Notices , Proceedings of the 16th ACM SIGPLAN conference on Object oriented programming, systems, languages, and applications**, Volume 36 Issue 11

Full text available:  pdf(198.11 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The ability to extend a language with new syntactic forms is a powerful tool. A sufficiently flexible macro system allows programmers to build from a common base towards a language designed specifically for their problem domain. However, macro facilities that are integrated, capable, and at the same time simple enough to be widely used have been limited to the Lisp family of languages to date. In this paper we introduce a macro facility, called the Java Syntactic Extender (JSE), with the superio ...

6 E-commerce: SweetDeal: representing agent contracts with exceptions using XML rules, ontologies, and process descriptions

Benjamin N. Grosof, Terrence C. Poon

May 2003 **Proceedings of the twelfth international conference on World Wide Web**

Full text available:  pdf(481.94 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

SweetDeal is a rule-based approach to representation of business contracts that enables software agents to create, evaluate, negotiate, and execute contracts with substantial automation and modularity. It builds upon the situated courteous logic programs knowledge representation in RuleML, the emerging standard for Semantic Web XML rules. Here, we newly extend the SweetDeal approach by also incorporating process knowledge descriptions whose ontologies are represented in DAML+OIL (emerging standa ...

Keywords: DAML+OIL, OWL, RDF, XML, business process automation, declarative, description logic, electronic commerce, electronic contracts, intelligent software agents, knowledge representation, knowledge-based, logic programs, ontologies, process descriptions, process knowledge, rules, semantic web, semantic web services, web services

7 Applications: A role-based delegation framework for healthcare information systems

Longhua Zhang, Gail-Joon Ahn, Bei-Tseng Chu

June 2002 **Proceedings of the seventh ACM symposium on Access control models and technologies**

Full text available:  pdf(538.01 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

As organizations implement information strategies that call for sharing access to resources in the networked environment, mechanisms must be provided to protect the resources from adversaries. The proposed delegation framework addresses the issue of how to advocate selective information sharing in role-based systems while minimizing the risks of unauthorized access. We introduce a systematic approach to specify delegation and revocation policies using a set of rules. We demonstrate the feasibility ...

Keywords: access control, delegation, healthcare information system, revocation, role

8 Modeling dynamic collections of interdependent objects using path-based rules

Diane Litman, Peter F. Patel-Schneider, Anil Mishra

October 1997 **ACM SIGPLAN Notices , Proceedings of the 12th ACM SIGPLAN conference on Object-oriented programming, systems, languages, and applications**, Volume 32 Issue 10

Full text available:  pdf(2.51 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Standard object-oriented languages do not provide language support for modeling changing collections of interdependent objects. We propose that R++, an integration of the rule and object-oriented paradigms, provides a mechanism for easily implementing such models. R++ extends C++ by adding a new programming construct called the *path-based* rule. Such data-driven rules are restricted to follow pointers between objects, and are like "automatic methods" that are triggered by changes to monitors ...

9 Enhanced abstract data types in object-relational databases

Praveen Seshadri

August 1998 **The VLDB Journal — The International Journal on Very Large Data Bases**, Volume 7 Issue 3

Full text available:  pdf(119.21 KB)

Additional Information: [full citation](#), [abstract](#), [index terms](#)

The explosion in complex multimedia content makes it crucial for database systems to support such data efficiently. This paper argues that the "blackbox" ADTs used in current object-relational systems inhibit their performance, thereby limiting their use in emerging applications. Instead, the next generation of object-relational database systems should be based on enhanced abstract data type (E-ADT) technology. An (E-ADT) can expose the semantics of its methods to the database ...

Keywords: Database types, Extensibility, Object-relational database, Query optimization

10 A rule-based framework for role-based delegation and revocation

Longhua Zhang, Gail-Joon Ahn, Bei-Tseng Chu

August 2003 **ACM Transactions on Information and System Security (TISSEC)**, Volume 6 Issue 3

Full text available:  pdf(1.05 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Delegation is the process whereby an active entity in a distributed environment authorizes another entity to access resources. In today's distributed systems, a user often needs to act on another user's behalf with some subset of his/her rights. Most systems have attempted to resolve such delegation requirements with ad-hoc mechanisms by compromising existing

disorganized policies or simply attaching additional components to their applications. Still, there is a strong need in the large, distrib ...

Keywords: Role, access control, delegation, revocation, rule-based

11 Fast detection of communication patterns in distributed executions

Thomas Kunz, Michiel F. H. Seuren

November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**

Full text available:  pdf(4.21 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

12 An efficient boosting algorithm for combining preferences

Yoav Freund, Raj Iyer, Robert E. Schapire, Yoram Singer

December 2003 **The Journal of Machine Learning Research**, Volume 4

Full text available:  pdf(392.20 KB) Additional Information: [full citation](#), [abstract](#), [index terms](#)

We study the problem of learning to accurately rank a set of objects by combining a given collection of ranking or preference functions. This problem of combining preferences arises in several applications, such as that of combining the results of different search engines, or the "collaborative-filtering" problem of ranking movies for a user based on the movie rankings provided by other users. In this work, we begin by presenting a formal framework for this general problem. We then describe and ...

13 Face recognition: A literature survey

W. Zhao, R. Chellappa, P. J. Phillips, A. Rosenfeld

December 2003 **ACM Computing Surveys (CSUR)**, Volume 35 Issue 4

Full text available:  pdf(4.28 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

As one of the most successful applications of image analysis and understanding, face recognition has recently received significant attention, especially during the past several years. At least two reasons account for this trend: the first is the wide range of commercial and law enforcement applications, and the second is the availability of feasible technologies after 30 years of research. Even though current machine recognition systems have reached a certain level of maturity, their success is ...

Keywords: Face recognition, person identification

14 Bottom-up relational learning of pattern matching rules for information extraction

Mary Elaine Califf, Raymond J. Mooney

December 2003 **The Journal of Machine Learning Research**, Volume 4

Full text available:  pdf(175.06 KB) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

Information extraction is a form of shallow text processing that locates a specified set of relevant items in a natural-language document. Systems for this task require significant domain-specific knowledge and are time-consuming and difficult to build by hand, making them a good application for machine learning. We present an algorithm, RAPIER, that uses pairs of sample documents and filled templates to induce pattern-match rules that directly

extract fillers for the slots in the template. RAPI ...

15 Web-based specification and integration of legacy services

Ying Zou, Kostas Kontogiannis

November 2000 **Proceedings of the 2000 conference of the Centre for Advanced Studies on Collaborative research**

Full text available:  pdf(279.28 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

With the explosive growth of the Internet, businesses of all sizes aim on applying networkwide solutions to their IT infrastructures, migrating their legacy business processes into web-based environments, and establishing their own on-line services. To facilitate process and service integration, a complete and information rich service description language, is essential for server processes to be specified and for client processes to be able to locate services that are available in Web-enabled re ...

16 System-level power optimization: techniques and tools

Luca Benini, Giovanni de Micheli

April 2000 **ACM Transactions on Design Automation of Electronic Systems (TODAES)**, Volume 5 Issue 2

Full text available:  pdf(385.22 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This tutorial surveys design methods for energy-efficient system-level design. We consider electronic systems consisting of a hardware platform and software layers. We consider the three major constituents of hardware that consume energy, namely computation, communication, and storage units, and we review methods of reducing their energy consumption. We also study models for analyzing the energy cost of software, and methods for energy-efficient software design and compilation. This survey ...

17 Ada task taxonomy support for concurrent programming

Robert Chi Tau Lai

January 1991 **ACM SIGSOFT Software Engineering Notes**, Volume 16 Issue 1

Full text available:  pdf(1.47 MB) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

The Ada task taxonomy can be used as the main scheme to help programmers to develop concurrent programs. The conventional way of defining a taxonomy for software modules is not based on the interactive behavior of the modules. The behavior of Ada tasks is more dynamic than that of other Ada modules such as procedures, functions and packages. By classifying sets of tasks by their interactive characteristics, functions, and procedural behaviors, a task taxonomy can be formulated. Task taxonomy can ...

18 Why are some diagrams easier to work with? Effects of diagrammatic representation on the cognitive intergration process of systems analysis and design

Jungpil Hahn, Jinwoo Kim

September 1999 **ACM Transactions on Computer-Human Interaction (TOCHI)**, Volume 6 Issue 3

Full text available:  pdf(677.90 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Various diagrams have been used heavily in systems analysis and design without proper verification of their usability. However, different diagrammatic representations of the same information may vary in the computational efficiency of working with these diagrams. The objective of this research was to explore the effects of diagrammatic representations on the task of integrating multiple diagrams. The domain of systems analysis and design was used to generate examples and test the theory. A ...

grammar

19 Object-oriented development of integrated programming environments with ASDL

Bernd Krämer, Heinz-Wilhelm Schmidt

January 1988 **Proceedings of the 1988 ACM SIGSMALL/PC symposium on ACTES**

Full text available: [pdf\(1.37 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

ASDL is a metalanguage for specifying integrated programming environments as specializations and extensions of a language independent environment kernel. The language combines syntax-directed translation schemes with an object-oriented 'type system'. The type system supports data abstraction and multiple inheritance, thus encouraging extensibility, combination and reusability. Translation schemes are identified with generic manipulation operations associated with object types that allow the ...

20 Multiple-query optimization

Timos K. Sellis

March 1988 **ACM Transactions on Database Systems (TODS)**, Volume 13 Issue 1

Full text available: [pdf\(2.19 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Some recently proposed extensions to relational database systems, as well as to deductive database systems, require support for multiple-query processing. For example, in a database system enhanced with inference capabilities, a simple query involving a rule with multiple definitions may expand to more than one actual query that has to be run over the database. It is an interesting problem then to come up with algorithms that process these queries together instead of one query at a time. Th ...

21 An intelligent analyzer and understander of English

Yorick Wilks

 May 1975 **Communications of the ACM**, Volume 18 Issue 5

 Full text available: [pdf\(1.25 MB\)](#)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The paper describes a working analysis and generation program for natural language, which handles paragraph length input. Its core is a system of preferential choice between deep semantic patterns, based on what we call "semantic density." The system is contrasted: with syntax oriented linguistic approaches, and with theorem proving approaches to the understanding problem.

Keywords: artificial intelligence, computational linguistics, machine translation, natural language processing, paraplate, semantic density, semantic preference, stereotype, template, understanding

22 Analysis of navigation behaviour in web sites integrating multiple information systems

Bettina Berendt, Myra Spiliopoulou

 March 2000 **The VLDB Journal — The International Journal on Very Large Data Bases**,
Volume 9 Issue 1

 Full text available: [pdf\(281.14 KB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

The analysis of web usage has mostly focused on sites composed of conventional static pages. However, huge amounts of information available in the web come from databases or other data collections and are presented to the users in the form of dynamically generated pages. The query interfaces of such sites allow the specification of many search criteria. Their generated results support navigation to pages of results combining cross-linked data from many sources. For the analysis of visitor naviga ...

Keywords: Conceptual hierarchies, Data mining, Query capabilities, Web databases, Web query interfaces, Web usage mining

23 Spoken dialogue technology: enabling the conversational user interface

 March 2002 **ACM Computing Surveys (CSUR)**, Volume 34 Issue 1

 Full text available: [pdf\(987.69 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Spoken dialogue systems allow users to interact with computer-based applications such as databases and expert systems by using natural spoken language. The origins of spoken dialogue systems can be traced back to Artificial Intelligence research in the 1950s concerned with developing conversational interfaces. However, it is only within the last decade or so, with major advances in speech technology, that large-scale working systems have been developed and, in some cases, introduced into commerce ...

Keywords: Dialogue management, human computer interaction, language generation, language understanding, speech recognition, speech synthesis

24 A software engineering perspective on algorithmics

Karsten Weihe

March 2001 **ACM Computing Surveys (CSUR)**, Volume 33 Issue 1

Full text available:  pdf(1.62 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#), [review](#)

An algorithm component is an implementation of an algorithm which is not intended to be a stand-alone module, but to perform a specific task within a large software package or even within several distinct software packages. Therefore, the design of algorithm components must also incorporate software-engineering aspects. A key design goal is adaptability. This goal is important for maintenance throughout a project, prototypical development, and reuse in new, unforeseen contexts ...

Keywords: algorithm engineering

25 Model-based recognition in robot vision

Roland T. Chin, Charles R. Dyer

March 1986 **ACM Computing Surveys (CSUR)**, Volume 18 Issue 1

Full text available:  pdf(4.94 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

This paper presents a comparative study and survey of model-based object-recognition algorithms for robot vision. The goal of these algorithms is to recognize the identity, position, and orientation of randomly oriented industrial parts. In one form this is commonly referred to as the "bin-picking" problem, in which the parts to be recognized are presented in a jumbled bin. The paper is organized according to 2-D, 2½-D, and 3-D object representations, which are used as the basis for ...

26 Document Formatting Systems: Survey, Concepts, and Issues

Richard Furuta, Jeffrey Scofield, Alan Shaw

September 1982 **ACM Computing Surveys (CSUR)**, Volume 14 Issue 3

Full text available:  pdf(5.36 MB)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

27 Gross motion planning—a survey

Yong K. Hwang, Narendra Ahuja

September 1992 **ACM Computing Surveys (CSUR)**, Volume 24 Issue 3

Full text available:  pdf(6.40 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Motion planning is one of the most important areas of robotics research. The complexity of the motion-planning problem has hindered the development of practical algorithms. This paper surveys the work on gross-motion planning, including motion planners for point

robots, rigid robots, and manipulators in stationary, time-varying, constrained, and movable-object environments. The general issues in motion planning are explained. Recent approaches and their performances are briefly described, a ...

Keywords: collision detection, computational geometry, implementation, motion planning, obstacle avoidance, path planning, spatial representation

28 Computational strategies for object recognition

Paul Suetens, Pascal Fua, Andrew J. Hanson

March 1992 **ACM Computing Surveys (CSUR)**, Volume 24 Issue 1

Full text available:  pdf(6.37 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

This article reviews the available methods for automated identification of objects in digital images. The techniques are classified into groups according to the nature of the computational strategy used. Four classes are proposed: (1) the simplest strategies, which work on data appropriate for feature vector classification, (2) methods that match models to symbolic data structures for situations involving reliable data and complex models, (3) approaches that fit models to the photometry and ...

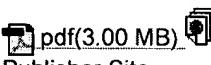

Keywords: image understanding, model-based vision, object recognition

29 Evaluating message understanding systems: an analysis of the third message understanding conference (MUC-3)

Nancy Chinchor, David D. Lewis, Lynette Hirschman

September 1993 **Computational Linguistics**, Volume 19 Issue 3

Full text available:

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)
[Publisher Site](#)

This paper describes and analyzes the results of the Third Message Understanding Conference (MUC-3). It reviews the purpose, history, and methodology of the conference, summarizes the participating systems, discusses issues of measuring system effectiveness, describes the linguistic phenomena tests, and provides a critical look at the evaluation in terms of the lessons learned. One of the common problems with evaluations is that the statistical significance of the results is unknown. In the disc ...

30 The design of the E programming language

Joel E. Richardson, Michael J. Carey, Daniel T. Schuh

July 1993 **ACM Transactions on Programming Languages and Systems (TOPLAS)**,
Volume 15 Issue 3

Full text available:  pdf(2.78 MB)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#), [review](#)

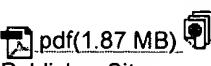

Keywords: extensible database systems, persistent object management

31 A maximum entropy approach to natural language processing

Adam L. Berger, Vincent J. Della Pietra, Stephen A. Della Pietra

March 1996 **Computational Linguistics**, Volume 22 Issue 1

Full text available:

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)
[Publisher Site](#)

The concept of maximum entropy can be traced back along multiple threads to Biblical

times. Only recently, however, have computers become powerful enough to permit the widespread application of this concept to real world problems in statistical estimation and pattern recognition. In this paper, we describe a method for statistical modeling based on maximum entropy. We present a maximum-likelihood approach for automatically constructing maximum entropy models and describe how to implement this app ...

32 TASK forces: Distributed software for solving problems of substantial size

Anita K. Jones, Karsten Schwans

September 1979 **Proceedings of the 4th international conference on Software engineering**

Full text available:  pdf(1.12 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

TASK is a 'high level' specification language for defining software that executes on distributed computers. Software is in the form of task forces—collections of communicating parallel processes that cooperate to achieve a common goal. Using the TASK language, a programmer specifies the interrelated components of his task force: modules exporting functions which are potentially executed in parallel, multiple data and code objects, and processes. The user may adapt the ...

33 Predictive engineering models based on the EPIC architecture for a multimodal high-performance human-computer interaction task

David E. Kieras, Scott D. Wood, David E. Meyer

September 1997 **ACM Transactions on Computer-Human Interaction (TOCHI)**, Volume 4 Issue 3

Full text available:  pdf(368.70 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Engineering models of human performance permit some aspects of usability of interface designs to be predicted from an analysis of the task, and thus they can replace to some extent expensive user-testing data. We successfully predicted human performance in telephone operator tasks with engineering models constructed in the EPIC (Executive Process-Interactive Control) architecture for human information processing, which is especially suited ...

Keywords: cognitive models, usability engineering

34 Eliciting software process models with the E3 language

Maria Letizia Jaccheri, Gian Pietro Picco, Patricia Lago

October 1998 **ACM Transactions on Software Engineering and Methodology (TOSEM)**, Volume 7 Issue 4

Full text available:  pdf(1.48 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Software processes are complex entities that demand careful understanding and improvement as they determine the quality of the resulting product. A necessary step toward the improvement of an organization's process is a clear description of the entities involved and of their mutual relationships. Process model elicitation aims at constructing this description under the shape of a software process model. The model is constructed by gathering, from several sources, process ...

Keywords: associations, process model elicitation, software process modeling

35 Declarative specification of Web sites with S

Mary Fernández, Daniela Florescu, Alon Levy, Dan Suciu

March 2000 **The VLDB Journal — The International Journal on Very Large Data Bases**,
Volume 9 Issue 1

Full text available: pdf(188.65 KB) **Additional Information:** full citation, abstract, citations, index terms

S is a system for implementing *data-intensive* Web sites, which typically integrate information from multiple data sources and have complex structure. S's key idea is separating the management of a Web site's data, the specification of its content and structure, and the visual representation of its pages. S provides a declarative *query language* for specifying a site's content and structure, and a simple *template language* for specifying a site's HTML representation. This paper ...

Keywords: Declarative query languages, Web-site management

36 A survey of image registration techniques

Lisa Gottesfeld Brown

December 1992 ACM Computing Surveys (CSUR), Volume 24 Issue 4

Full text available: [!\[\]\(6e4b84f7cd4113db90dbd29ce1e47793_img.jpg\) pdf\(5.20 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Registration is a fundamental task in image processing used to match two or more pictures taken, for example, at different times, from different sensors, or from different viewpoints. Virtually all large systems which evaluate images require the registration of images, or a closely related operation, as an intermediate step. Specific examples of systems where image registration is a significant component include matching a target with a real-time image of a scene for target recognition, mon ...

Keywords: image registration, image warping, rectification, template matching

37 TSL: task sequencing language

David Helmbold, David Luckham

May 1985 **ACM SIGAda Ada Letters , Proceedings of the 1985 annual ACM SIGAda international conference on Ada**, Volume V Issue 2

Full text available: [!\[\]\(c212aa74cadd4a1e0736594bd824ecbf_img.jpg\) pdf\(1.39 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

TSL is a language for specifying sequences of tasking events in Ada¹ programs. TSL specifications are submitted with an Ada program and are monitored at runtime for consistency with the actual tasking events as they occur. This paper presents a preliminary design for TSL, an informal overview of its capabilities, and an operational semantics.

³⁸ The AppLeS parameter sweep template: user-level middleware for the grid

Henri Casanova, Graziano Obertelli, Francine Berman, Rich Wolski

November 2000 **Proceedings of the 2000 ACM/IEEE conference on Supercomputing (CDROM)**

Full text available:  [pdf\(256.33 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)
 [Publisher Site](#)

The Computational Grid is a promising platform for the efficient execution of parameter sweep applications over large parameter spaces. To achieve performance on the Grid, such applications must be scheduled so that shared data files are strategically placed to maximize re-use, and so that the application execution can adapt to the deliverable performance potential of target heterogeneous, distributed and shared resources. Parameter sweep applications are an important class of applications ...

Keywords: Application Level Scheduling, Adaptive Runtime Scheduling, Computational

Grid, Grid Middleware, Parameter Sweeps Applications, Scheduling Heuristics, Distributed Storage.

39 Special issue on natural language generation: Generating natural language summaries from multiple on-line sources

Dragomir R. Radev, Kathleen R. McKeown
September 1998 **Computational Linguistics**, Volume 24 Issue 3

Full text available:  [pdf\(2.36 MB\)](#)  Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)
Publisher Site

We present a methodology for summarization of news about current events in the form of briefings that include appropriate background (historical) information. The system that we developed, SUMMONS, uses the output of systems developed for the DARPA Message Understanding Conferences to generate summaries of multiple documents on the same or related events, presenting similarities and differences, contradictions, and generalizations among sources of information. We describe the various components ...

40 Special issue on using large corpora: I: Retrieving collocations from text: Xtract

Frank Smadja
March 1993 **Computational Linguistics**, Volume 19 Issue 1

Full text available:  [pdf\(2.41 MB\)](#)  Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)
[Publisher Site](#)

Natural languages are full of collocations, recurrent combinations of words that co-occur more often than expected by chance and that correspond to arbitrary word usages. Recent work in lexicography indicates that collocations are pervasive in English; apparently, they are common in all types of writing, including both technical and nontechnical genres. Several approaches have been proposed to retrieve various types of collocations from the analysis of large samples of textual data. These techni ...
